

CertainTeed Blow-In Blanket® System

With InsulSafe® SP

CertainTeed
SAINT-GOBAIN

Blow-In Blanket® System With InsulSafe® SP Fiber Glass Insulation

THE BEST SIDEWALL INSULATION SYSTEM

Protect your home with the Blow-In Blanket System (BIBS®) with InsulSafe® SP from CertainTeed. With its seamless installation, BIBS with InsulSafe SP provides outstanding thermal efficiency that can pay dividends throughout the life of a home.

BIBS is a patented process in which InsulSafe SP is blown into cavities behind netting. The process requires installation techniques designed specifically for BIBS applications.

THERMALLY EFFICIENT AND COST EFFECTIVE

With the most Rs per inch, BIBS with InsulSafe SP provides the highest R-value possible in typical sidewall applications. When installed at recommended density levels, it yields an R-15 in 2" x 4" construction and an R-24 in 2" x 6" construction.

A CUSTOM-FIT BLANKET

What separates BIBS with InsulSafe SP from other insulation systems is its custom-fit seamless thermal blanket and outstanding thermal performance in irregular-shaped cavities and around obstructions.

FILLS VOIDS

Tests show that even a small gap in an insulated cavity can cause a substantial increase in heating and cooling costs.

BIBS with InsulSafe SP makes it easier for installers to provide a superior insulation job with no voids around wires, electrical boxes or pipes; odd-sized framing assemblies are no problem. With BIBS with InsulSafe SP, there's no cutting or fitting.

The absence of voids means you're assured of full R-value for a superior, finished job and exceptional thermal efficiency.

BIBS with InsulSafe SP completely surrounds electrical boxes to help prevent costly drafts and cold spots.

EXCELLENT SOUND CONTROL

By filling all voids and gaps, BIBS with InsulSafe SP significantly reduces unwanted sounds from appliances, televisions, teenagers, stereos and ventilation systems. And installing it around pipes and plumbing fixtures will help decrease the noise common with running water. It's ideal for master bedroom suites, bathrooms, home offices and entertainment rooms.

BIBS with InsulSafe SP provides a continuous thermal barrier around water pipes and delivers outstanding acoustic control.

WON'T SETTLE

BIBS with InsulSafe SP will not settle or separate. That means the insulation will maintain its thermal efficiency for the life of the home.

SUSTAINABLE

BIBS with InsulSafe SP is manufactured by CertainTeed, a company committed to sustainable building practices and a member of the United States Green Building Council (USGBC). The product is manufactured with no formaldehyde and is GREENGUARD® Gold Certified for superior indoor air quality.

VERSATILE AND DEPENDABLE

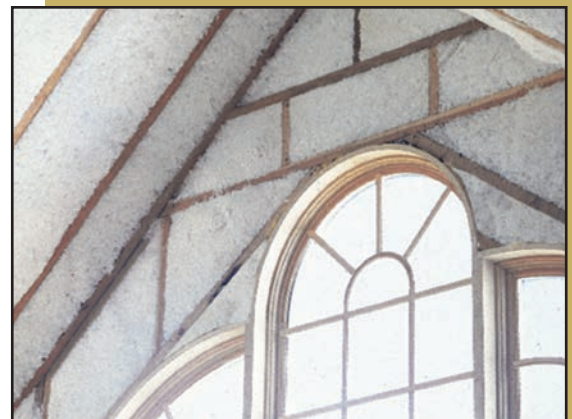

BIBS with InsulSafe SP is the right choice for these applications:

- New construction
- Remodeling projects
- Attics, sidewalls and floors
- Metal framing
- Sound control

BIBS With InsulSafe SP Performs.

- EXCELLENT COVERAGE
- THERMALLY EFFICIENT
- NONCOMBUSTIBLE
- WON'T SETTLE
- LASTS FOR THE LIFE OF A HOME
- SUSTAINABLE ENERGY EFFICIENCY
- GREENGUARD® GOLD CERTIFIED
- NONCORROSIVE
- WON'T ROT OR DECAY
- EXCELLENT SOUND CONTROL
- WON'T ABSORB MOISTURE OR SUPPORT FUNGUS GROWTH
- LIMITED LIFETIME WARRANTY
- FORMALDEHYDE-FREE, NO ADDED DYES OR ACRYLICS

With a seamless installation and custom fit around cavity obstructions, builders now can provide homeowners an exceptional level of thermal comfort by installing BIBS with InsulSafe SP.

For every insulation challenge, there's a CertainTeed solution.

[**Be Certain**]™

You can **Be Certain**™ no other manufacturer offers the depth and breadth of interior and exterior building solutions, knowledge, innovation and sustainability that CertainTeed does. Our advanced, multi-product solutions optimize building efficiency, while creating beautiful, comfortable environments where people can thrive. We continue to shape the future of the building materials industry with a new generation of integrated building solutions.

That's confidence worth building on.™
