

HeartFelt™ Ceilings & Walls - Colors

HeartFelt™ ceiling panels are available in white, black, five shades of grey, and five earth tones, offering opportunities to create visual gradients and rhythms at the ceiling plane. Coloration is inherent to the felted polyester material; the blend of colored and white fibers within each panel determines its shade. The material resists fading.

Given the unique and special nature of our HeartFelt ceiling product, steps should be taken (before and during installation, as well as over the lifetime of the ceiling) to avoid or minimize static and the accumulation of dust, lint, dirt or airborne particles on or around the felt. Hunter Douglas does not warrant against or take responsibility for any such static or accumulation. Please contact us for further details.

NOTE: Colors are for illustration purposes only.
