Starter Shingles
Starter shingles save application time. They’re designed to work specifically with different styles of CertainTeed shingles for consistent appearance and performance.

SWIFTSTART™
High-performance starter is designed specifically for use with Landmark Series. High- performance starter link shingles to use as starters, you can save time and money by starting with SwiftStart.
• Code-compliant, meets minimum 2” headlap requirement for many shingle styles. Many competing products do not.
• Each 60-piece bundle covers 16 linear feet.
• Required to obtain enhanced warranty.

HIGH-PERFORMANCE STARTER
For use with Grand Manor®, Highland Slate® and Belmont® shingles.
• Dual-resilient strips at cut-off edge for 110 mph wind resistance
• Installation is a snap — no need to cut tabs off expensive shingles
• Provides a straight factory-cut eave edge for a clean look
• Excellent as a rake edge for increased wind resistance
• Saves time and money
Specifications
• 10” x 36” starter strip
• Dual-sealant strips — CertaSeal™ Plus Modified Sealant
• Packed 34 pieces (102 linear feet) per bundle

PRESIDENTIAL STARTER
Required for Presidential Shake® TL and Presidential Shake® shingles and can be used with Arcadia Shake®.
• Assures Class A fire rating
• Two layers of a straight factory-cut eave edge; staggered offset for maximum water tightness
• Easy to handle and apply
• Available in the entire Presidential TL and Presidential color line
• Saves time and money
Specifications
• 13-1/4” x 40” starter when applied
• Packed 22 pieces (36 linear feet of double-layer coverage) per bundle

SWIFTSTART®
Metric starter shingle is designed specifically for use with Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with SwiftStart.
• Code-compliant, meets minimum 2” headlap requirement for metric shingles; many competing products do not.
• Each 60-piece bundle covers 16 linear feet.
• Required to obtain enhanced warranty.

FROM START TO FINISH
Starter shingles, ventilation & hip & ridge caps — all designed to work with your CertainTeed shingles.

Integrity Roof System™
A COMPLETE APPROACH TO LONG LASTING BEAUTY AND PERFORMANCE
With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A CertainTeed Integrity Roof System combines key elements that help ensure you have a well-built roof for long-lasting performance.

It all starts with CertainTeed’s broad line of shingles, featuring brilliant color blends, dramatic styles and shadow lines, and the strongest warranties in the industry. The right shingle can mean the difference between an average, everyday look or a beautiful roof that’s the talk of the neighborhood.

Shingles are just the beginning — to keep your new roof performing and looking great for years to come it takes a complete CertainTeed Integrity Roof System approach.

1. Waterproofing Underlayment
   The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.

2. Water-Resistant Underlayment
   Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.

3. Starter Shingles
   Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.

4. Shingles
   Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.

5. Hip & Ridge Caps
   Available in numerous profiles, these accessories are used on the roof’s hip and ridge lines for a distinctive finishing touch to your new roof.

6. Ventilation
   A roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with Intake Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.

**Starter shingles, ventilation & hip & ridge caps - all designed to work with your CertainTeed shingles.**

**ACCESSORIES**

**Smooth Starts, Beautiful Finishes**
Ventilation is an important element of a home's design and construction. Effective attic ventilation helps prevent attic heat buildup, humidity and ice-dams by continuously moving air along the underside of the roof. CertainTeed Ridge Vents are designed to combine with sufficient intake vents, such as CertainTeed Intake Vent, to create a balanced ventilation system along the entire roofline. With these venting solutions, air can be moved up, down and laterally to improve energy efficiency and comfort.

**RIDGE VENTS**

**Ridge Vents** are designed with an external baffle to deflect wind and weather over the vent to protect the attic, fascia, soffit and roof surface. The external baffle is made of high-impact copolymer shingles. Rolled Ridge Vents are easily installed over the slot in the shingles of the roof or as an over-lap accessory and can be used with virtually any roofing material. Available in various lengths depending on the pitch of your roof. Ridge Vents are available in a variety of colors, are lightweight and very resistant to impact damage.

- **Features**
  - 12" wide for application over standard ridge units
  - Predrilled with 3/8" holes for easy positioning
  - **Specifications**
    - Covers 20 linear feet per box
  - **Benefits**
    - **Limited Lifetime Warranty and 5-Year SureStart™ Protection**
  - **Sizes**
    - 3" Exposed Class A Fire Rated
    - 4" Exposed
    - 5" Exposed Class A Fire Rated
  - The external baffle creates low pressure and the vent openings to "pull" air in from the attic.
  - **Intake Vents**
    - Available in smooth or ribbed 3/4" low profile helps it blend in with the roofline.
    - **Features**
      - Designed with internal baffles to deflect wind and weather over the vent to protect the attic, fascia, soffit and roof surface. The internal baffle is made of high-impact copolymer shingles. Intake Vents are available in various lengths depending on the pitch of your roof. Intake Vents are available in a variety of colors, are lightweight and very resistant to impact damage.

**VENTILATION**

Accurate ventilation is an important element of a home’s design and construction. Effective attic ventilation helps prevent attic heat buildup, humidity and ice-dams by continually moving air along the underside of the roof.

**Cedarcrest Ridge Vent**

Cedarcrest Ridge Vent is designed to extend the life of the roof, allowing adequate ventilation of the attic area. It’s constructed of heavy-duty, high-impact copolymer shingles.

**Features**

- Ideal for roofs with a 4/12 pitch or greater
- Made with reinforced fiberglass and protected by a Class A fire rating
- Designed for use with any style CertainTeed Ridge Vent
- Provides adequate attic ventilation
- Easy installation
- Low profile design
- Provides ventilation along the entire length of the roof

**Specifications**

- 23” wide x 12” high
- 15 linear feet per box
- Universal installation

**Cedarcrest Ridge Vent**

Cedarcrest Ridge Vent fits any CertainTeed’s standard ridge vents and standard ridge caps. CertainTeed Ridge Vent is a high-quality, free-flowing ridge vent that provides ventilation along the entire length of the roof.

**Features**

- High-performance ventilation
- High-quality performance
- Easy installation
- Low profile design
- Provides ventilation along the entire length of the roof

**Specifications**

- 23” wide x 12” high
- 15 linear feet per box
- Universal installation

**Solaris® Hip & Ridge**

Solaris® Hip & Ridge is a high-quality, free-flowing ridge vent that provides ventilation along the entire length of the roof.

**Features**

- High-performance ventilation
- High-quality performance
- Easy installation
- Low profile design
- Provides ventilation along the entire length of the roof

**Specifications**

- 23” wide x 12” high
- 15 linear feet per box
- Universal installation
VENTILATION

Accurate ventilation is an important element of a home’s design and construction. Effective attic ventilation helps prevent attic heat buildup, humidity and ice-dams by continuously moving air along the underside of the roof.

CertainTeed Ridge Vents combined with sufficient intake vents, such as CertainTeed Intake Vent, are the most efficient and effective systems you can install.

RIDGE VENTS

Features:
- Designed with an external baffle to deflect wind and window over the vent to help protect the attic from rain and snow infiltration. The external baffle creates low pressure over the vent openings to “pull” air in from the attic.
- In-building ventilation system achieves a higher volume of air than any other fixed-vent system.
- Can be used to supplement existing soffit or under-eave vents as well.

Benefits:
- Provides year-round ventilation to the attic.
- Provides exterior-attic ventilation along the entire underside of the roof.
- Silver design for visual appeal.

Specifications:
- Easy installation—has pre-drilled cut guides for easy installation;
- Provides three levels of weather protection
- Provides 5-Year SureStart™ Protection
- Co-polymer construction
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents

ROLLED RIDGE VENT

Features:
- Designed with an external baffle to deflect wind and window over the vent to help protect the attic from rain and snow infiltration. The external baffle creates low pressure over the vent openings to “pull” air in from the attic.
- Buil-in ventilation system has pre-drilled cut guides for easy installation.

Benefits:
- In-building ventilation system achieves a higher volume of air than any other fixed-vent system.
- Can be used to supplement existing soffit or under-eave vents as well.
- Provides year-round ventilation to the attic.
- Provides exterior-attic ventilation along the entire underside of the roof.
- Silver design for visual appeal.

Specifications:
- Easy installation—has pre-drilled cut guides for easy installation;
- Provides three levels of weather protection
- Provides 5-Year SureStart™ Protection
- Co-polymer construction
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents

INTAKE VENT

Features:
- Provides year-round ventilation to the attic.
- Provides exterior-attic ventilation along the entire underside of the roof.
- Provides three levels of weather protection

Benefits:
- In-building ventilation system achieves a higher volume of air than any other fixed-vent system.
- Can be used to supplement existing soffit or under-eave vents as well.
- Provides year-round ventilation to the attic.
- Provides exterior-attic ventilation along the entire underside of the roof.

- Provides three levels of weather protection
- Provides 5-Year SureStart™ Protection
- Co-polymer construction
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents
- No maximum pitch limitation
- Can be used in conjunction with any CertainTeed® Ridge Vents

Hip & Ridge Accessory

Accessory shingles are used to finish the hips and ridges of your roof and carry the same warranty as the shingles they are applied over. There are a number of options designed to complement the appearance of CertainTeed® shingles while providing the same level of protection and durability.

MOUNTAIN RIDGE

For use with Presidential® TL, Presidential® Series, Highland® Style and Belmont™. Also available in 3”, 6”, 7” and 9” heights. Mountain Ridge or Ridge Vents also available in 9”, 12” widths for application over standard ridge vents.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Cedar Crest

For use with Landmark®, Presidential® Series, Highland Style and Belmont™. Also available in 3”, 6”, 7” and 9” heights. Cedar Crest or Ridge Vents also available in 9”, 12” widths for application over standard ridge vents.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Shadow Ridge Accessory

For use with Landmark®, Landmark® Series, Landmark® Fast-Track® and Presidential® Series.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Solaris Hip & Ridge

For use with Grand Manor®, Carriage House, Highland Style and Belmont™.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Shingle Ridge Accessory

For use with Grand Manor®, Landmark® Series, Landmark® Fast-Track® and Presidential® Series.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Northgate Hip & Ridge

For use with Northgate.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Cedar Crest

For use with Presidential® TL, Presidential® Series, Highland® Style and Belmont™. Also available in 3”, 6”, 7” and 9” heights. Cedar Crest or Ridge Vents also available in 9”, 12” widths for application over standard ridge vents.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Shadow Ridge Accessory

For use with Landmark®, Landmark® Series, Landmark® Fast-Track® and Presidential® Series.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Solaris Hip & Ridge

For use with Grand Manor®, Carriage House, Highland Style and Belmont™.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Shingle Ridge Accessory

For use with Grand Manor®, Landmark® Series, Landmark® Fast-Track® and Presidential® Series.

Specifications:
- Covers 10 linear feet per bundle
- ”9” exposure
- aluminium

Northgate Hip & Ridge

For use with Northgate.
Starter Shingles

Starter shingles save application time. They’re designed to work specifically with different styles of CertainTeed shingles for consistent appearance and performance.

**SWIFTSTART™**
- **Dual-sealant strips** at bottom edge for 110 mph wind resistance
- **Installation is a snap** — no need to cut tabs off expensive shingles
- Provides a straight factory-cut eave edge for a clean look
- Excellent as a rake edge for increased wind resistance
- **Saves time and money**

**Specifications**
- **10” x 36”** starter strip
- **Dual-sealant strips** — CertaSeal™ Plus Modified Sealant
- **Packed 34 pieces (102 linear feet) per bundle**

**HIGH-PERFORMANCE STARTER**
- For use with Grand Manor®, Highland Slate®, and Belmont® shingles.
- **Assures Class A fire rating**
- **Two layers of a straight factory-cut eave edge; staggered offset for maximum water tightness**
- **Easy to handle and apply**
- **Available in the entire Presidential TL and Presidential color line**
- **Saves time and money — no need to remove tabs from expensive shingles**

**Specifications**
- **13-1/4” x 40”** starter when applied
- **Packed 22 pieces (36 linear feet of double-layer coverage) per bundle**

**PRESIDENTIAL STARTER**
- Required for Presidential Shingles and can be used with Grand Manor, Highland Slate, or Belmont shingles.
- **Waterproofing Underlayment**
- The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.
- **Water-Resistant Underlayment**
- Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.
- **Shingles**
- Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.
- **Hip & Ridge Caps**
- Available in numerous profiles, these accessories are used on the roof’s hip and ridge lines for a distinctive finishing touch to your new roof.
- **Ventilation**
- A roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with Intake Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.
