Mildew may be a problem in some areas. It appears as black spots on surface dirt and is usually first detected in areas not subjected to rainfall, such as under eaves and porch enclosures. For removal, prepare a solution as shown.

CAUTION: Greater concentrations may cause damage to the vinyl materials.

Mix together:
- 1/3 cup detergent (Tide®, for example)
- 2/3 cup Trisodium Phosphate (SoilMax, for example, formerly Soilax)
- 1 quart 5% Sodium Hypochlorite (Clorox®, for example)
- 3 quarts of water

If the above solution does not readily remove the mildew spots, request a mildew-type cleaner from your contractor.
